HOME REMODELING STUDENTS LEND A HAND TO PRESCHOOL

For a young child, extensive exposure to the sun on a hot day can be dangerous. Children under the age of four can experience sunburn or overheat rather quickly. Therefore, students in Mr. Rick Stephens Home Remodeling class decided it was time to make the playground a little safer. They built sunshades on the ECE playground that would provide shade for the youngsters. Although the shades were purchased, students were expected to set poles and put together the framing and hang the shades. The job proved successful and now our preschool students will be able to find relief on a hot sunny day.

ASVAB TEST ADMINISTERED TO STUDENTS

On October 31st, 94 students signed up to take the ASVAB test at Pioneer. The ASVAB is a multiple-aptitude battery that measures developed technical skills and abilities and helps predict future academic and occupational success in the military. Once the test scores are compiled, an armed services representative will sit down with each student and explain the test results. This is the first year the ASVAB has been offered at Pioneer.

A Pioneer Success Story!

The following correspondence is from Medical Technologies instructor Dawn Roberts and a recent conversation she had with former Pioneer student Hannah Evans of Galion regarding the life saving techniques learned from Ms. Roberts while at Pioneer;

From Hannah: " My neighbor was mowing our lawn and I looked outside to find her on the ground. I ran outside to a blue and purple woman. I called 911 and started CPR. I brought back color to her face. The squad came and had to shock her heart and they took her to Galion hospital and life flighted her to Columbus. The squad came back to tell me that I saved her life. My neighbor is now awake and responding to all of the doctors commands! I just wanted to let you know that, and I wanted to thank you for giving me the opportunity to learn CPR."
